Installation Steps

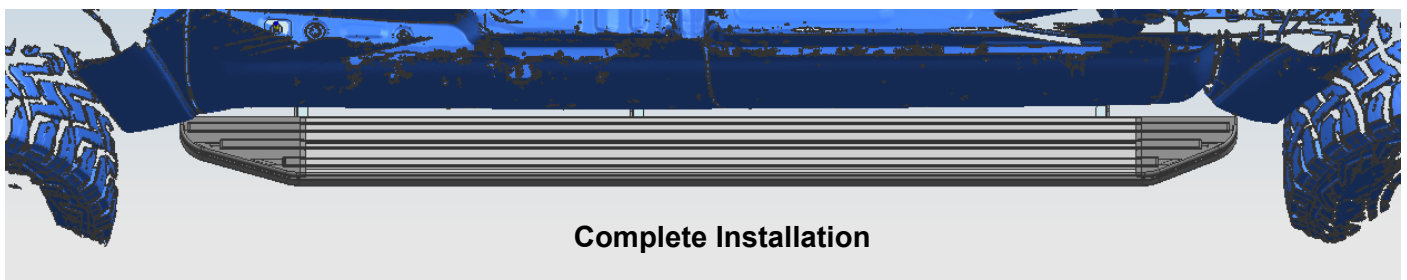

STEP1: Verify all parts are present.

STEP2: Find the corresponding bracket installation positions under the vehicle as below figures shown. (below figures are show the left side of the vehicle)

STEP3: Fix the brackets on the corresponding position with existing T bolts on the running board according to the Installation Figure. (Do not need to tighten the standard parts) Place the running board on the brackets to install.

STEP4: Adjust the running board to the appropriate position, then tighten up all the standard parts. The installation position and manner of the left side brackets are the same as that of the right side.

NOTE

Any damages and losses caused by improper installation and application, goes beyond our quality warranty.
