### **Before Installation**

- Read all instructions carefully before installation. This will help prevent damage to your car.
- Images are for reference only. Your product may vary slightly, but the assembly process remains the same.

### Care and Cleaning

- You can clean the product with mild soap.
- For long-term performance and reliability, regularly check and tighten all hardware.

## Parts list

#### 52" TRAVELER CROSS BAR FOR CHEVY COLORADO 15-22 / GMC CANYON 15-22 /NISSAN FRONTIER 05-21/FORD RANGER 19-23

#### Two different clamps

## **Installation Instruction**

## Installation Steps

Step 1:

Unlock both sides, insert support base into crossbar, then lock both sides. Page 3 of 5

Notice: Bring the mobile plate forward before placing the support base into the cross bar.

(The left side's installation is the same with the right.)

Step 2:

Install the assembled crossbar on the vehicle's roof. Repeat for the other side.

Notice: There are two kinds of clamps available for use.

- 1. Place the support base on the rain gutter, hooking it onto the roof's edge. If the clamp doesn't fit properly, replace it with the alternative clamp that was also provided.
- 2. Push the support base fully in the direction of the arrow. Tighten the plastic bolts securely. Close the door.

### Step 3:

Inspect the crossbar's position, tightening all bolts if correct, or adjusting and then tightening if necessary.

Step 4: Installation complete!
