Installation Steps

Installation Figure:

Step 1: Verify all parts are present. Read instructions carefully. Use illustration to identify brackets.
 Step 2: Find three mounting holes for the brackets on the right side of the vehicle body, as shown in the following figure:

Step 3: Use standard parts to fix the Passenger/Right Front Mounting Bracket to the vehicle body, and the installation method is as follows. The installation method on the left side is consistent.

Step 4: Use standard parts to fix the Passenger/Right Center Mounting Bracket to the vehicle body, and the installation method is as follows. The installation method on the left side is consistent.

Step5: Use standard parts to fix the Passenger/Right Rear Mounting Bracket to the vehicle body, and the installation method is as follows. The installation method on the left side is consistent.

Step6: Place the right running board on the installation surface of the right side of front bracket, center bracket and rear bracket. Adjust the appropriate position, and use the small square head bolts on the running board and corresponding standard parts to lock and install the right running board with the right side brackets. Install the left running board symmetrically.

Finished installation:

NOTE

Any damages and losses caused by improper installation and application, goes beyond our quality warranty.
